

Vampire Guide

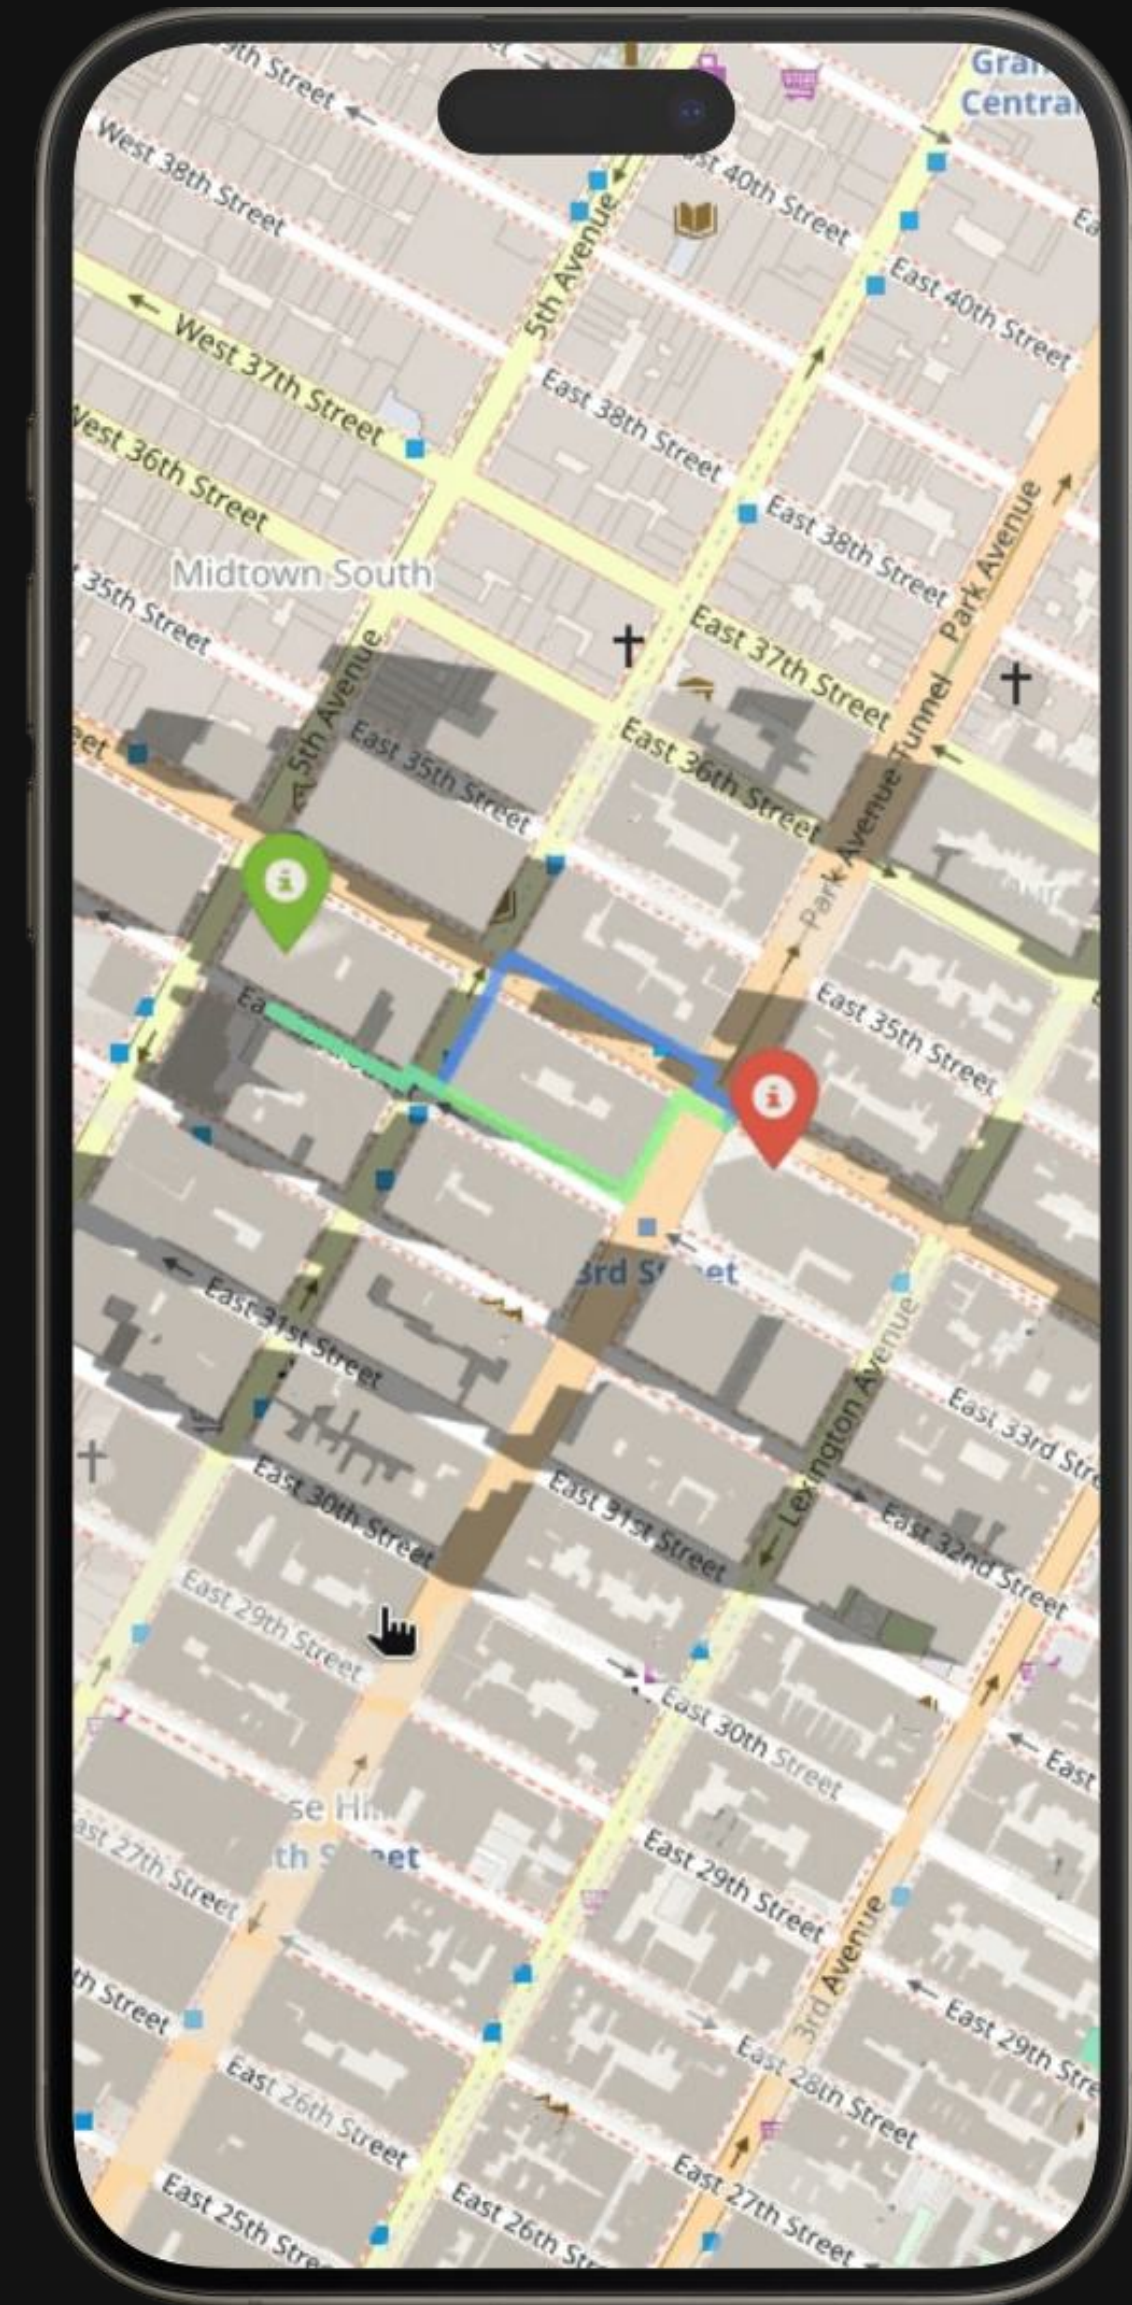

Navigate geospatial data
and extract original insight
from ***shadows***

Primary usecase: **Cool Walks**

How we tricked pathfinding algorithms to think
sunlit sidewalks are longer

Product snapshot

Business directions

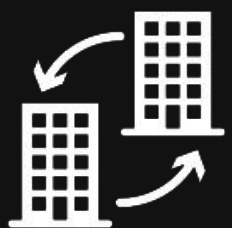

Park your car and not faint from the heat

Utilize other available OSMNX features

Help local ice cream shops get recognized

Employ the Google Places API

Provide data scientists with insightful data

Query the data we have aggregated

Help the ill avoid excessive sunlight

Incorporate the dangerous Direct Sunlight Radiation data

or just sell customer data
